AUTOPSY REPORT

GLOGOVA 01 GRAVE SITE

Case No: GL01 / 760B

Autopsy Date: 25-May-01

Mortuary: Visoko

Summary:

An incomplete body. The skull and the upper vertebrae of the cervical spine were absent. The remains were totally skeletonized. There was some clothing with personal possessions.

The person was male, aged between 30 to 55 and measured 179.7+/-7.7 cm in height as estimated from anthropology data. There were no particular identifying features.

The comminuted fractures in right pelvic bone, sacrum, 5th lumbar vertebra and the left sacro-iliac joint were due to a gunshot wound. The skull and the upper cervical spine were missing in this person. Therefore the probable cause of death was gunshot wound to the pelvis.

Cause of Death:

It is my determination that the cause of death in case number **GL01 / 760B** was:

Probably due to gunshot wound to the pelvis.

This formal report is based upon the autopsy report that I prepared at the time of my examination. Both reports truly and accurately reflect my findings.

Signed: 

Dr A. Seneviratne, MBBS, Dip Legal Med, MD (For. Med), DMJ

Date: 29-May-01

A. General Description of Remains:

A largely skeletonized body. Little amount of soft tissues in the chest and pelvic area. There is some clothing with personal possessions.

B. Clothing and Other Items:

Clothing: 1- Black jacket with red lining , holes in the back.
Short sleeved white shirt, shredded.

Blindfolds: No

Ligatures: No

Other Items: Wallet, pocket knife and a wristwatch.

C. Identifying Features:

Sex

From examination of soft tissues: Not possible

From anthropology details: Male

Age Range

From anthropology data: 30 - 55 years

Build Not possible

Height (cm)

From estimation of intact body: Not possible

From anthropology data: 179.7+/-7.7 cm

Hair

Head hair: Not possible

Beard: Not possible

Moustache: Not possible

Teeth

General description: Skull is missing.

Tattoos: Not possible

Scars: Not possible

Other Features: Deformity with abnormal bone formation in the right elbow (an old injury?).

D. Body Parts Missing: See Anthropology Report Anthropologist L. Leppo

E. Injuries:

Findings on fluoroscopy

Radiographer T. Meyer

None

Main injuries described

Head & Neck

1 Head is missing, only two cervical vertebrae are present.

Probably ante-mortem	Probably post-mortem	Cannot tell
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Trunk

2 Comminuted fracture in right clavicle.

3 Comminuted fracture in ilium of right pelvic bone.

4 Comminuted fracture in sacrum and 5Th lumbar vertebra.

5 Fracture in left iliac bone at the sacro iliac joint.

Probably ante-mortem	Probably post-mortem	Cannot tell
<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
